House in Our New York Salesrooms

OUR EXHIBITS: In our various exhibits, as mentioned here, we show large and small cottages and camps — erected and attractively furnished.

We also have on display greenhouses, play houses, kennels, bird houses, poultry and pigeon houses, garden equipment, etc.

We hope you will be able to visit at least one of these exhibits and become acquainted with the Hodgson products. However, if you cannot call on us, this catalog is well illustrated by actual photographs, so that it is possible for you to make your selection from it and mail your order. Because of the distant points we ship to, much of our business comes to us in this way.

TERMS: Prices in this catalog are net, and F.O.B. Dover, Mass. Full payment to be sent with order; or a deposit of 25%, the balance to be paid after receipt of goods, if satisfactory references are given. *Prices subject to change without notice.*

FIFTY YEARS OF SUCCESSFUL PREFABRICATED HOUSING

THERE IS A TENDENCY to think of prefabricated houses as an ultra-modern development, like streamlined trains or automobile radios. Actually it was in 1892 that Mr. E. F. Hodgson first developed the idea of building houses in a new way — completely in sections that could be erected quickly with bolts, without any sawing or nailing.

Mr. Hodgson built a small factory and started to make and sell houses, camps and buildings of various kinds. Around 1900 when the "horseless carriage" came in, there grew a demand for Hodgson "Auto Stables", giving a strong impetus to the new business.

Unusual Advantages Brought Demand

The advantages of the unique Hodgson type of construction — ease and quickness of erection, elimination of fuss and confusion in construction, flexibility and adaptability, — quickly attracted many customers and the business grew. Today there are Hodgson Houses in all parts of the United States and

in many foreign countries. Letters from owners of houses erected in 1905, 1907 and other dates many years ago, say that the houses are still in use and are giving great satisfaction. Many Hodgson owners have altered their houses or made additions, taking advantage of the endless variation possible with Hodgson sectional construction.

Hodgson Construction is Fundamentally Sound

Mr. Hodgson is still the active head of this business, founded fifty years ago upon an ingenious idea. After all this experience in prefabricated building, the search still goes on at the Hodgson plant for new and better materials, construction methods, designs and modern improvements. But there is no compromise with quality, or with the fundamental soundness that has been built into every Hodgson job from the start. Every Hodgson House is built so it can be as livable, as staunch, and as charming fifty years from now as it is today.

H O D G S O N

Prefabricated Camp Cottages

*Built Complete at the Factory—Saving Time and Money—Scientifically
Constructed to Ship Anywhere—Used Universally—Delightful to Live in—
Made of Materials to Last a Lifetime—Quickly Erected—Easily Enlarged*

ILLUSTRATED ON PAGES 4 TO 27 are the Hodgson Camp Cottages, a product of 50 years of prefabricated house construction.

The exterior of these houses is made of enduring red cedar, with the sides oiled, the roof and shutters stained Cabot's moss green.

The interior has a tan colored waterproof and wind-proof fibre lining, with woodwork stained brown. The floors are of shellacked hard pine. The partitions are made of Celotex.

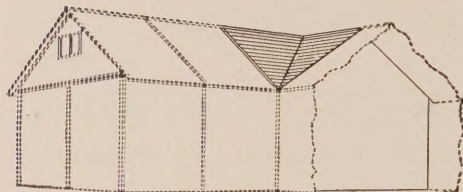

The houses are built in completed sections at the

factory — sides, roofs and floors. Windows are fitted in place and doors are hung. The sections are shipped so completely fabricated that the smallest houses can be erected, with the use of our special key bolts, in a few hours' time; the larger houses in a few days' time.

These houses are used for cottages, vacation houses, both summer and winter; school camps, overnight camps, guest or overflow houses; for many uses in large camps where small buildings are needed; also for play houses, skating houses, rest houses, storage houses, garages, etc.

Hodgson Camp House Construction

UNIT PRICES IN BACK OF CATALOG

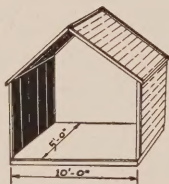

A valley roof section to turn the units a quarter turn

The Exterior Woodwork is dipped in tanks of linseed oil before being made up into sections. Roof and shutters stained moss green. All Outside Nails are hot-dipped galvanized and the hardware is either brass or cadmium plated, thus preventing rust.

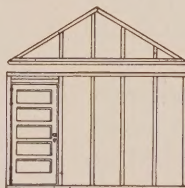

Sections are bolted together with our special Wedge Key Bolts, an invention of ours dating back 50 years.

Our Wedge Key Bolts that make the houses go up like magic

A 5 x 10 ft. additional unit to add to the first unit

A 10 foot Partition with peak and door

Made in Units. Easily and quickly increased in size.

With 50 years' experience in making unit built houses, we know that these Camp Houses are as practical as it is possible to make.

The Frames are of strong Oregon pine and cedar. The Outside Covering is of enduring cedar, which will last a lifetime.

A house, containing two 5 x 10 ft. Units, with 2 Gable Ends. To this can be added more Units with partitions, doors, windows, etc.

We use thousands of these each year, saving our customers much expense in the erection of our buildings.

The Interior is lined with a heavy tan fibre, waterproof and windproof, making a very dry camp. Woodwork is stained walnut brown. Floors are hard pine and shellacked. Exterior sides are oiled natural wood with roofs, doors and shutters stained moss green. (Continued on page 5)

8 x 15 foot Clapboarded Porch. This is made up of 1-8 x 10 ft. porch, plus 1-5 x 8 ft. additional unit of porch. (See Page 14.)

Screens for all windows, galvanized \$2.50, bronze \$3.00

These sections are used in making up the side walls and partitions of all our camp houses

Partitions are made up of a cedar frame and covered with Celotex. They are furnished with or without peaks or doors.

The Panel Doors are of the best quality, with good mortised locks.

The Casement Windows have automatic adjusters and secure locks. Regular double hung windows have locks.

Floors, Roofs, Sides and Partitions are all made in sections with doors and windows installed, and are quickly Key Bolted together. A 10 x 10 ft. Camp Cottage can easily be erected in an hour.

There is no Roofing Material to put on after the building is up.

The sections are shipped with sides oiled, roof and trimmings stained moss green. Floors shellacked.

Hodgson Camp Cottage No. 4201

The little Camp illustrated on opposite page, consisting of one room and porch is the smallest we manufacture. This can, of course, be had without the porch, if desired. Being constructed in sections, additional rooms or porches can easily be added at any time.

The itemized list, at the right, shows just how these Camp Cottages are figured. Porches, doors, windows, etc., may be added, or deducted from any of the plans shown in this booklet, adding to or reducing the prices as per costs shown on Pages 39 and 40.

Hodgson Camp Cottages

The smallest camp cottage generally consists of one room and a porch; although the 10 x 10 ft. room only can be purchased and other rooms or porches can be added later. The itemized list below will show how this house is figured.

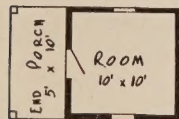

ITEMIZED LIST CAMP 4201, PLAN 1

2-5 x 10 ft. Units.....	@ \$65.00	\$130.00
2-10 ft. Gable Ends.....	@ 35.00	70.00

New York City

Camp 4202, Plan 3
\$429.00

Hodgson Camp Cottage No. 4202

The three plans on this page illustrate how the same size camp can be laid out for various uses — play houses, hunters' and fishermen's cabins, skating houses, week-end camps, over-night camps, etc. Being wind tight very little heat is required to keep them comfortable on the coldest days. Attractively finished outside, with an easily cleaned fibre lining on the inside, they need but little care and upkeep.

Furnishings

We have a very complete list of special furnishings as shown on pages 28 to 31. A camp cottage similar to Plan 4205-2 is shown at our New York office, furnished as shown in the plan.

Hodgson Camp Cottage No. 4206

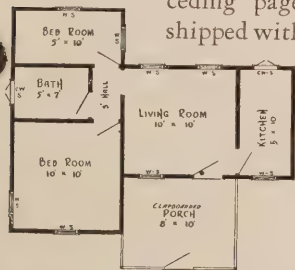

Valley Roofs

The Hodgson Camp Cottages shown on Pages 15 through 21 illustrate the use of one valley roof, so that one portion of the house runs at right angles to the other.

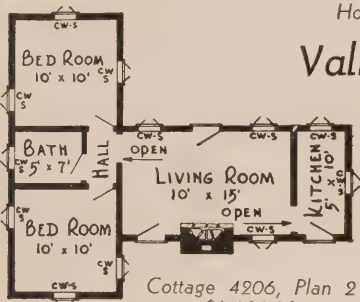

By use of this valley roof many more rooms

can be added, and yet the frontage will be no greater than that of the "straight line" houses shown on the

preceding pages. Camp houses are all shipped with oiled sides, green stained roof and shutters. May easily be painted at a future time, if desired.

Kennel and Greenhouse— No Damage In Hurricane

"I am very glad to be able to report that although we were in the midst of the hurricane in Fairfield, neither our Hodgson Kennel nor our Hodgson Greenhouse was in any way damaged.

"I don't know how the greenhouse withstood the wind, for we lost nearly all of our huge old trees, but both buildings came through the storm very well."

(Mrs. Robert C. Flack)
120 East End Ave.,
New York, N. Y.

Camp As Play House

"The Camp A, Plan 1, house which we purchased from you is giving real pleasure to our youngsters, providing a thoroughly attractive play house for them."

(Mrs.) BARRY FARIS
150 Brite Ave.,
Scarsdale, New York

This complete and attractive Hodgson Camp Cottage, Plan No. 1, is located at our Dover, Mass. Outdoor Exhibit which is open daily. This house is one of several that are on display there.

Hodgson Camp Cottage 4208

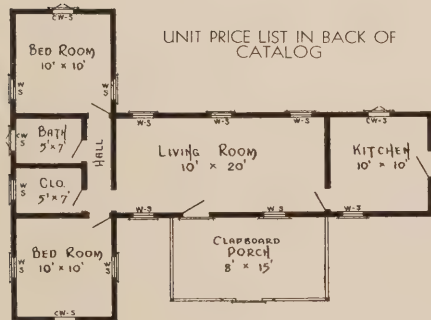

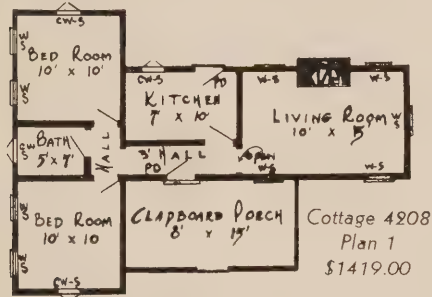

Interiors

The interiors of our Camp Cottages are lined with a special waterproof and windproof tan colored fibre lining, which is not only pleasing in appearance, but makes them practical to use for week-ends and holidays through the late fall and early winter, with a fireplace or one of our fireplace stoves. The wood framework is exposed, and stained a dark walnut. The partitions are of Celotex, with stained wood trim. The whole effect is pleasing, livable, and affords a natural background for almost any type of furniture.

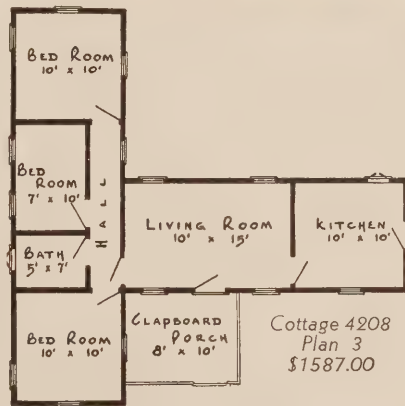

Being constructed almost entirely of Cedar, the air is always "sweet," regardless of how long the Camp has been closed. There is never that "musty" odor, so often found in the conventional type of Camp construction.

Fireplaces are built after the camp is erected

Cottage 4208, Plan 2 — \$1585.00

Cottage 4208
Plan 3
\$1587.00

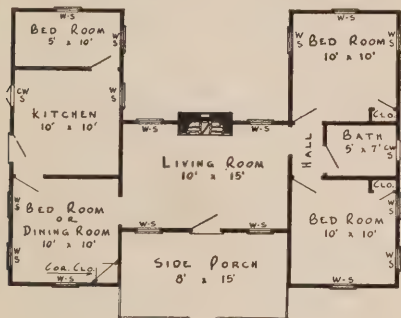

Hodgson Camp Cottage 4209

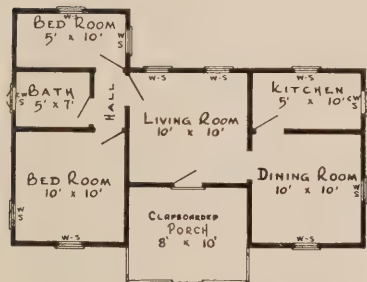

On pages 22 through 25 are shown Hodgson Camp Cottages made up with the use of two of our valley roof units.

These two-valley roof houses form an "H" and have always proved extremely popular, due to the fact that the Living Room is in the center, the Bed-rooms being located in one wing, while the Service quarters are on the opposite side.

By use of the "H" design the houses are architecturally balanced, and almost double the number of rooms can be laid out on a lot of small frontage.

Camp 4209, Plan 1 — \$1799.00

Camp 4209, Plan 2 \$1363.00

This very attractive Court, formed by the two wings of an "H" style house, shows an outdoor fireplace built into the main house chimney

MARTHA HOUSTON PUBLICATIONS

29 EAST 47TH STREET

NEW YORK

"In 1931, when I was Advertising Director of the Junior League Magazine, I bought a Hodgson House (Cape Cod bungalow). I have occupied it summer and winter and have had equal comfort in both seasons, owing to its faultless insulation."

AMY ASHMORE CLARK

Hodgson Camp Cottage 4210

Cottage 4210, Plan 1 — \$2148.00

Other Roofs Blown Off

"Our house was not damaged in the least by the hurricane, although the wind was so severe that it blew the roofing off a smaller building a few feet away from the house.

"We have derived a great deal of pleasure from our camp house and within a few years expect to make some additions."

CHARLES M. DRAIN

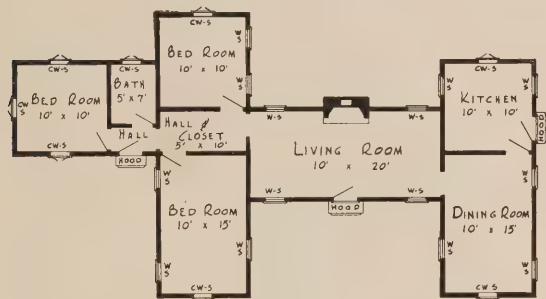

79-38 69th Rd., Glendale, L. I., N. Y.

Bill-Billy-Ville—A completely landscaped miniature estate for the grandsons of Mr. and Mrs. William Fox, on Long Island

This little estate, facing a tiny lake, is complete with plantings, lamp posts, statues of nurseryland characters, winding paths, all on a miniature scale—a juvenile paradise, with Hodgson bird houses, arches, garden houses, kennels, etc. One of the Hodgson Houses consists of a living room, bunk room, bath, kitchen—the interior as unique as the exterior.

Hodgson Camp Cottage No. 4211

Camp 4211 — \$2,183.00

This Hodgson Camp Cottage is located in the Adirondack Mountains. It has a picturesque setting between a mountain lake and a wooded hill. It is ideally planned for recreational living.

As originally planned it was one of our H shaped designs. After several years of use, a wing consisting of one or more bedrooms was added by means of a third valley roof — this without lengthening the original wings.

On the Shore of Long Island

"Our Hodgson House apparently withstood the recent hurricane without any damage at all. It is located about 75 yards from the shore of Long Island Sound, but on high ground, so that the water did not reach it. The house is also well protected by a thick high hedge and trees. Nevertheless, it did take a hard beating from rain and wind without injury, in spite of this protection."

E. W. GARBISCH,
Chrysler Building, New York, N. Y.

HODGSON HOUSES

A village of Hodgson houses in Italy

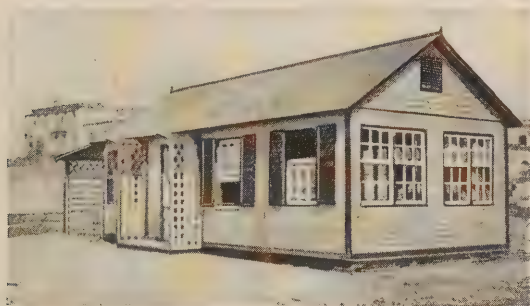

A Hodgson cottage used for over 15 years at Dr. Grenfell's settlement on the coast of Labrador

TO ALASKA AND THEN HAWAII

"My brother-in-law shipped a Hodgson House to Northern Alaska several years ago, and then after three years had it sent to Hawaii, where he now resides. His satisfaction in his 'traveling home' has prompted our inquiry. We shall certainly keep Hodgson Houses in mind in our planning."

RALPH V. M. GARLINE,
219 Redmond St., New Brunswick, N. J.

AROUND THE WORLD

Hodgson cottage in Jerusalem

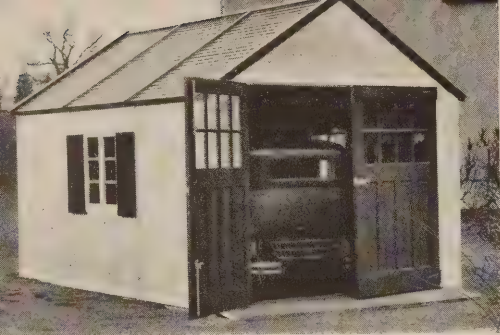

A Hodgson cottage in the interior of Africa

A Hodgson house used as United States Minister's residence at Managua, Nicaragua

A Hodgson cottage used by Prof. Carl W. Blägen and Prof. W. T. Semple in excavating on the plains of ancient Troy, Turkey

Illustrated above is our Camp Garage
(Often used as a small boat house)

This Garage is made up of our Camp Cottage Units. The outside is oiled, with a green stained roof, and interior is finished in the fibre lining and dark stained woodwork.

These Garages are made up in a stock size of 10 x 20 feet, and include one window and a pair of shutters in the center of each side. Price not including wooden floor, \$295.00.

The Garage, pictured at the right, is one of the many styles that we manufacture, combining chauffeur's quarters, work shop, tool storage room, etc. with a Garage for any number of automobiles.

If interested in this type of Garage, we will be glad to draw up plans, according to your own special requirements; insulated for winter use, or fibre lined, for summer occupancy.

Prefabricated Garages

The Garage illustrated at the right (below) is of our house construction — can be insulated, if it is desired to heat same. This type Garage is painted three coats of paint outside, stained inside, and is of the same careful construction as that of the Hodgson Houses. Prices not including a floor, or chauffeur's quarters in rear, as follows:

1-Car size, 12 x 18 ft., with 2 windows.....	\$ 375.00
2-Car size, 18 x 18 ft., with 4 windows.....	660.00
3-Car size, 20 x 36 ft., with 6 windows.....	1,050.00
3-Car size, 20 x 36 ft., as per plan above, with chauffeur's quarters	2,200.00

HODGSON HOUSES

For fifty years Hodgson Houses have held a unique position in all parts of the world. Their inviting simplicity and harmonious lines appeal to people of good taste. With their attractive and well-planned interiors, they have given enjoyment to people in all sorts of circumstances, and climate, under the most trying conditions. The construction is simple. Made of enduring red cedar, in completely finished sections with windows in place, doors hung — in fact, all carpentry work and exterior painting completed at the factory, and even the hard pine floors are sanded and shellacked before shipping, so that the houses are quickly erected by local labor, or by our factory men. Thus the purchasers of Hodgson Houses are saved much time, expense and the confusion and many worries connected with building operations.

The interiors of these houses are of Celotex, the woodwork finished in a dark walnut stain, or the interior can be left unfinished by us so that purchaser can paint or paper walls as desired. The construction is of the double wall type, with a dead air space between the inner and outer walls. Celotex, we believe one of the best insulators today, is used on the side walls, ceilings, partitions, and under the floors, thus giving a cool house in summer and more comfortable in the coldest weather than a well built plastered house. See pages 36 and 37 for further construction information.

CONSTRUCTION DETAILS

A CONSTRUCTION backed by fifty years of unit house building, and tested in all climates and under all weather conditions.

HODGSON Houses (Pages 32-81) are made according to the following specifications unless otherwise designated. They are made 12, 18 and 24 feet wide and any length in multiples of 6 ft.

FLOORS: Made of the best quality of spruce floor joist, in sections of 6 ft. in length by the width of the units (12 ft., 18 ft. or 24 ft.) covered with clear rift Oregon pine or fir, sanded and shellacked. Grooved ledgers are attached to the floor sections into which a tongue on the side wall section fits, making a tight joint between floor and side wall. This is our stock floor.

If specified, we will furnish double boarded floors with a waterproof paper between boards.

Or, our stock single boarded floor Arctic (Celotex) lined. All houses Arctic lined include the Arctic lining under floors, unless otherwise specified.

Or, at little extra expense we can line under our stock single floors with a heavy waterproof fibre, making them both damp and wind proof.

SIDES: Single Wall Construction: A frame made of a good grade of red cedar and Oregon pine, covered with a heavy waterproof fibre, and over this rabbeted red cedar clapboards put on with galvanized nails. The interior shows the tan fibre lining, with brown stained frame exposed, made in

completed sections, with windows, doors, hardware, etc., fitted in place. (All camp cottages are made with single walls only. Partitions fill entire space between floor and roof.)

Double Wall Construction: This is similar to the single wall construction described above with the addition of our Arctic board placed over the studs, built into the sections at the factory, making a dead air space between the outer and inner walls. This Arctic board (Celotex) is one-half inch thick and is the best insulator against heat, cold and noise that we have found practical to use.

If you wish to paint or paper the interior of a Hodgson House, we use the Arctic board with the smooth surface exposed. This takes paint or paper perfectly.

Our stock finish is the rough side of the Arctic board exposed, with the woodwork stained walnut brown, making a most attractive finish without further expense.

ROOFS: Our stock roofs are made of a frame of the highest grade of Oregon pine, lined with a fibre and covered with red cedar rabbeted boarding. This makes a very durable and attractive roof. It is made in completed sections and can be taken apart any number of times without the slightest damage to any of the materials. It is guaranteed against defects.

Roofs may be regular stock as above, or cedar or asphalt shingles.

Where a shingled roof is preferred to our stock roof, we

use an Oregon pine frame, covered with matched boarding and furnish without extra charge, either asphalt or red cedar shingles, which are put on after the house is erected. In this case, if the roof is to be Arctic lined, we furnish the Arctic board to be put on after the house is up, thus covering the roof framework inside.

CEILINGS: The ceilings consist of frames running across the rooms usually forming panels about 3 ft. x 6 ft. These frames are rabbeted to receive Arctic board panels of the same size. These ceilings are usually placed on a level with the top of the side walls of the room, 7½ ft. high, although they may be raised to 8½ ft. in large rooms, or left out entirely, throwing the room open into the roof.

DOORS: The best quality of pine or fir doors are used, 1 3/8 inches thick, fitted with Colonial mortised locks, and glass knobs, and hung on brass finished hinges, unless otherwise specified.

WINDOWS: Windows are fitted in place and have locks and all necessary hardware, and are painted.

BLINDS OR SHUTTERS: Are furnished when specified. They are fitted complete with heavy galvanized hardware of the Colonial type and are painted.

PAINTING: The exteriors of our houses are painted three coats of the best lead and oil paint in the following colors: Roof, blinds and doors, slate green. Sides, sash and French glass door are painted white. Or the house may be had with

the sides stained brown; roof and trimmings moss green. If special colors are desired, there will be an extra charge of 2% of the cost of the house.

HARDWARE: All finish hardware is of good quality, and is attached to the different parts of the house where required. Hardware necessary to erect the house is packed separately and each package is marked where it is to be used.

ERECTION: Directions for erecting with foundation and erection plans are sent with each house.

When we quote a price for delivering and erecting a house it does not include the foundation itself except if the house is to be set on a post foundation, in which case we furnish and set posts that are chemically treated to last longer in the ground. Boarding, lattice or steps about the foundation are not included, but can be furnished at an additional cost.

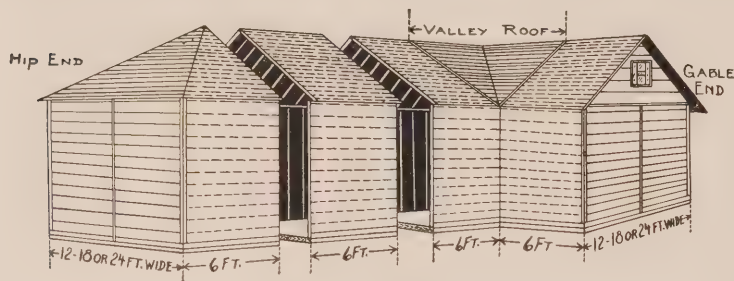

If the house is to have a wall foundation, or is to have a cellar under a part of it, we then furnish only the foundation plan and cellar plan without charge, the mason work, plumbing, etc., to be done by local help at owner's expense, unless otherwise specified.

We have found that the most satisfactory method of erection, if the house is at all large, saving the owner much trouble, is to have one of our foremen supervise and help in its erection, at a nominal charge, the owner to hire additional local help.

These specifications are subject to change without notice if we deem it necessary to do so.

E. F. HODGSON CO.

HOW TO ESTIMATE THE COST OF A HOUSE

Hodgson Houses are prefabricated on the unit system, as illustrated by the above drawing. The units are 6 ft. long, in varying widths of 12 ft., 18 ft., and 24 ft. There are Hip and Gable Ends, and a Valley Roof unit which is used to turn the units at right angles. With this combination it is possible to make almost any plan you desire.

In order that you may understand how to estimate the cost of a Hodgson House we list the prices of these various prefabricated units in the back of the catalog. On page 57 we give you an example of an itemized estimate which makes use of the various units, with the porches, partitions, windows, blinds, etc., as shown in plan and photograph. This example illustrates the way you would use the figures in estimating any Hodgson House you want to plan. To the prices

of units, ends, valley roofs, etc., should be added the various types of windows, doors and porches as illustrated on pages 39 and 40.

Each house illustrated in this book, however, has its complete price listed beneath the plan. An itemized estimate similar to the one given on page 57 is available for any Hodgson House. We will gladly send you such an estimate without obligation to you, so that you may know just what is included

in our price, and eliminate any items to reduce the cost.

The prices listed do not include heating, wiring or plumbing fixtures, screens, shades, flower boxes, awnings, cabinets or fittings.

The foundation of the house must be figured separately as there are several types that are suitable. For instance, we have found that well-set treated posts are reasonable in price, last for years and are satisfactory.

Naturally, though, cement or brick piers are more lasting; and if conditions require it we recommend a wall foundation. This is especially needed if the Hodgson House is to be used the year around, for then it should have a cellar to accommodate a heating system.

All foundation plans are developed by us and are furnished free of charge after order is placed.

Style B has a 24 light stationary sash in front and an 8 light double hung window on each side. Price.....\$150.00

Hodgson House No. 4212

The house pictured on opposite page, with plans below, is one of the smallest we make in our regular house construction. It makes an excellent studio; a retreat for an out-of-the-way spot; a very satisfactory guest or overflow house; or a play house. With our double wall construction it is a cool and inviting little house for summer, and one that can be easily heated in winter.

"In the Tidal Wave at Buzzards Bay—"

"I think you may be interested in the bit of the following history of one of your houses that I have used for over ten summers.

"It stands about 100 ft. back from the quiet water of Buttermilk Bay at Buzzards Bay, Mass., on a bank about 15 ft. above the water. The day of the 1938 hurricane it took the full blast of the wind and tidal wave coming straight down the bay. The wave not only came at it from the front but rolled in through the back and side through a thick wooded land, washing everything before it, logs, branches, 'junk,' etc.

"The water rose all around the house about six feet, with 6 inches of water covering the entire house inside. When all was over and the water receded the house was surrounded by almost everything you could think of, 6 boats, pillars from houses, doors, parts of board walks, logs I couldn't move,

chairs, barrels and just about everything else. I had to take a shovel and dig a path to the front door that was two feet of solid — well, we call it just plain 'junk.'

"The interesting end of this tale is, that not one floor buckled, nor did the house move so much as half an inch on its cedar posts with all the punishment it took, and after it was all cleaned and fixed up, is now as good as ever.

"Do you wonder that I am very keen on Hodgson Portable houses? I would never want any other house for a summer home!

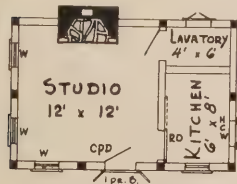

"Hoping this may interest any person who may think a Portable is not solid and feeling sure you will be glad to know what one of them took so well."

BEATRICE W. PRAY, Brookline, Mass.

Stood Hurricane and Tidal Wave

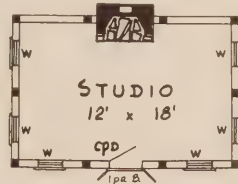

"The E. F. Hodgson Co. is entitled to be apprized of the fact, that the prefabricated house and garage, purchased from it more than ten years ago, withstood the fury of the hurricane and tidal wave which visited the Mecox Bay District, near Bridgehampton, L. I., where the buildings stand, on September 21, 1938."

F. W. LAURENTZ,
100 Broadway, New York, N. Y.

One plan for the Cape Cod house illustrated on the opposite page is shown above. An ideal plan if a small house is wanted, to which the addition of bedrooms, dining room and an enlarged kitchen could be made at any time.

Hodgson House No. 4214

Hodgson Cottage on the Canadian Boundary,
St. Louis County, Minnesota

Below is a Cape Cod style house with our Style V Colonial porch added

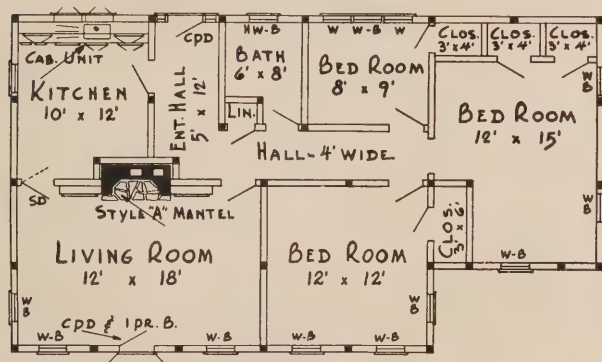

Hodgson House No. 4215

This Cape Cod house, used the year around in Dedham, Mass., makes a compact house that is easily heated in the coldest weather.

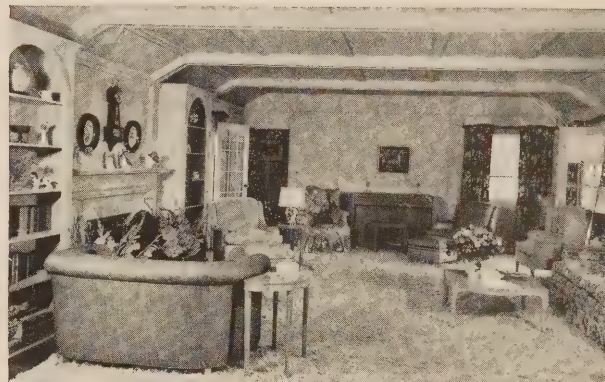

As the driveway is located at the rear, the use of an entrance hall was required. This space, in many cases, could be used as a small breakfast room, back porch with a large closet; or the kitchen and small bedroom could be enlarged.

Plan No. 4215

Double Walls.....\$3605.00
 Wide Siding, add.....187.00

A large rambling Hodgson House in Shohla, Pa. ➡

The 18 x 30 foot living room above illustrates our raised ceiling, with large ceiling beams.

Also shown is our Colonial Mantel with bookcases extending to the plate line.

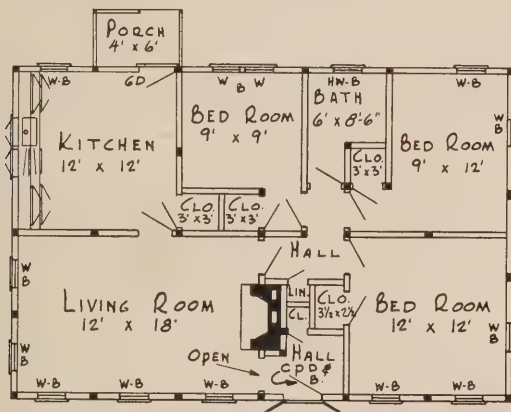

Hodgson House No. 4216

This Hodgson Cape Cod House, plan shown at left, is a well laid-out home for year around use. Compact and easily heated, it is finished outside in Brown Stain, with green stained blinds, thus creating the effect of the old Cape Cod or New England Farm House.

Plan No. 4216

Double Walls\$3,351.00
Wide Siding, add. 163.00

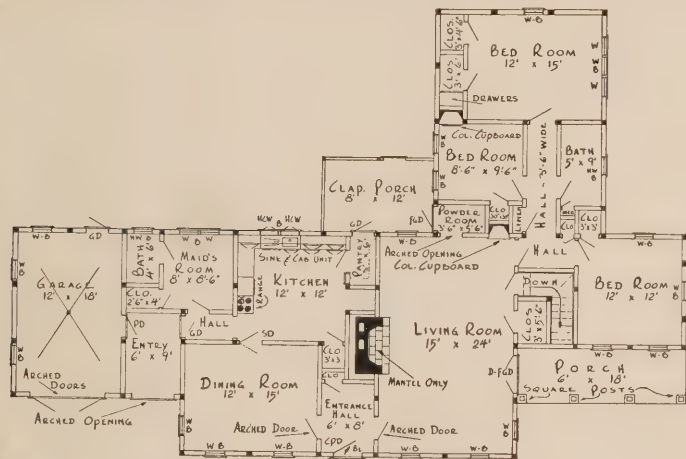

Full Exposure to Atlantic Gales

This Hodgson Cottage stood for years in a very exposed location on Nantucket. It was later moved to a new location and attached to another cottage. Mrs. Buckner writes: "Your house, that is, the original house (shown at left) was in good condition after 10 years buffeting by winds and salt spray."

(Mrs. E. R.) CATHERINE BUCKNER,
Delray Beach, Florida.

Plan No. 4217

Double Walls \$7,506.00
 Wide Siding, add. 360.00

"During the cold wave of the week of Dec. 26, 1933, when the temperature was less than ten degrees below zero, my house at Dedham, Mass., was at all times comfortable. To the best of my knowledge, the temperature never fell below the thermostatic control of 58-60 degrees at night and 68-70 degrees in the daytime.

"Considering the fact that previous checks show that I burned less coal than my neighbors for the same size house, I consider the above record a great tribute to the construction and insulation of the Hodgson Portable House."

ROGER AMORY, 19 Congress Street, Boston, Mass.

On this page is shown another example of Hodgson Cape Cod design.

This type of house makes a very compact Plan which is extremely desirable for winter use, and yet all the rooms have three exposures, so that they are cool during the hottest months.

A Year Around House in Massachusetts

The Hodgson House illustrated on the opposite page is located in Weston, Mass., and the plan above shows it. This same plan is erected in our New York office, completely furnished in an attractive manner.

At right we show a plan of a house of the same general design but with the bedroom wing reduced in size.

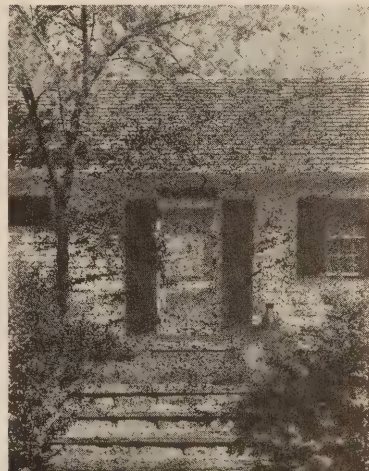

Plan No. 4221
PRICE UPON APPLICATION

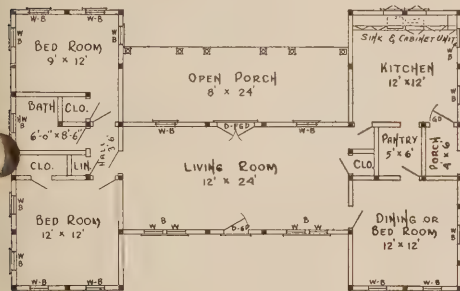

This Hodgson House, used the year around, makes an ideal home. Well planned, with easy access to the service quarters from either the living room or bedrooms, it is designed to save many steps.

Within a few weeks after erection, a Hodgson House blends beautifully in with the landscape and "belongs" to its surroundings.

One of the most popular types of houses prefabricated by us during these many years, is that of our "H" shape, illustrated on opposite page and as per plan below. Constructed with the living room in the center, bed rooms in one wing, the other a service wing, it offers at least two outside exposures to each room — making a cool, breezy house during the summer, yet fully insulated for winter use, if desired.

Plan No. 4222

Double Walls \$4,196.00
Wide Siding, add. 192.00

Hodgson Bed Room with White Painted
Woodwork and Papered Walls

BIDDLE, WHELEN & CO.
1606 WALNUT ST., PHILADELPHIA, PA.

"First with regard to the bungalow which was put through its first real baptism of fire when I went up grouse shooting last week. The little house is on top of the Hogback Ridge and the wind and rain whipped across with hurricane force; besides it was bitter cold. Not a breath of air or a drop of rain leaked in and the little Franklin stove kept the big front room as warm as toast. I may say that it will give me real pleasure to recommend your houses and equipment without reservation to anyone. We have had the greatest pleasure and satisfaction out of it last summer and this fall."

JOHN W. R. HILLIARD

Hodgson House No. 4223

A Low Rambling Hodgson
House, located in Mentor, Ohio

Plan No. 4223

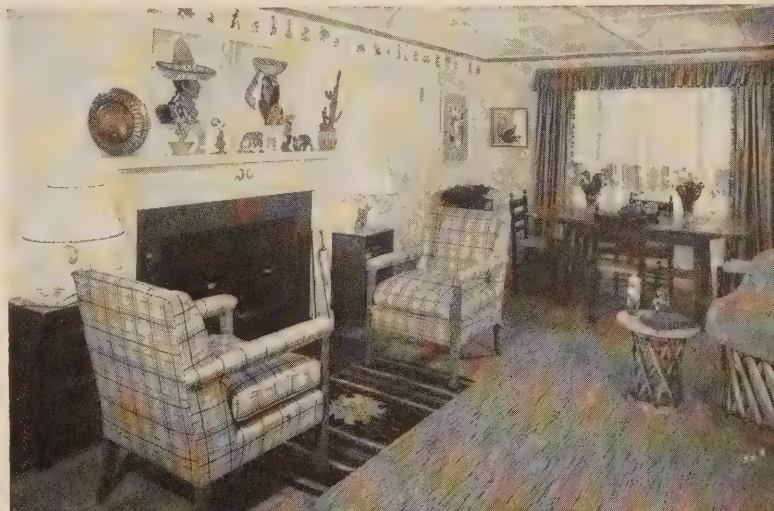

Double Walls \$10,719.00
Wide Siding, add 481.00

Located at Alexandria, Minnesota

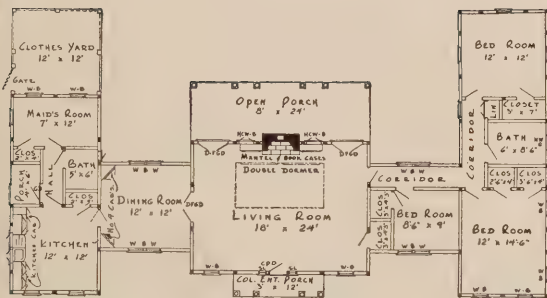

"I may say that the cottage and garage, which you forwarded me, have been found to be highly satisfactory, as I found that everything you sent complied fully with your statements and representations, and I think the best statement I can give you is if I were to start again to build a summer cottage, I would repeat the order and use your cottage and garage as they have been entirely satisfactory in all respects.

EDWARD H. CHANDLER,
Tulsa, Oklahoma.

At right, a Hodgson Living Room
Decorated in the Mexican Manner

Plan No. 4224

Double Walls \$6,566.00
Wide Siding, add. 310.00

Another popular Hodgson design. This low, rambling, well insulated house, located in Connecticut, has large, airy rooms, each with two, some three, outside exposures, making it an ideal summer home.

It contains many spacious closets, and the kitchen and service quarters are entirely isolated from the living portions of the house.

A Hodgson Dining Room, 18 x 18 ft., with a plate glass picture window 4 x 5 ft.

A Hodgson house on the sand dunes, at Southampton, Long Island, exposed to the broad Atlantic

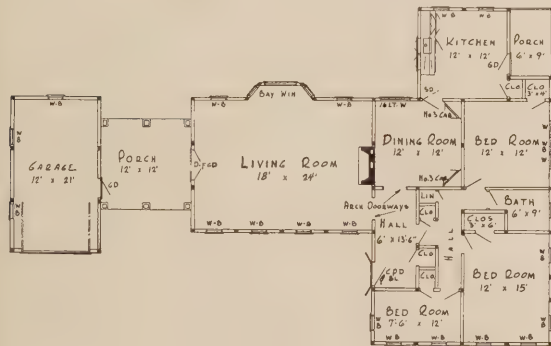

Hodgson House No. 4225

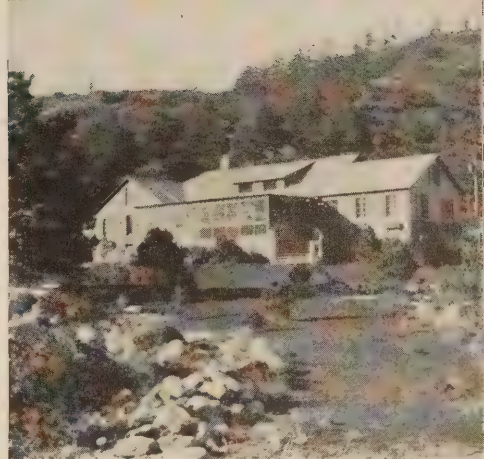

This "Farm House" design is located at our Dover, Mass., outdoor exhibit. It has the desirable rambling effect but it is in reality a compact, easily heated house. With a heating plant under the center of the right wing, the pipes have but a short run to any room in the house.

A 12 x 12 ft. unit, containing a maid's room, bath and closet can easily be added, off the kitchen, if desired.

Plan No. 4225

Double Walls.....\$6,813.00
Wide Siding, add 356.00

Hodgson Cottage in the Mountains,
at Colorado Springs, Colorado

Hodgson House at Union Springs, Alabama, on an 8000 Acre Game Preserve

"We find our Hodgson House at Union Springs, Ala., very comfortable in every way, and are delighted with it. It serves our purpose exactly, and with the grounds very nicely landscaped and planted it is a very attractive layout, I think."

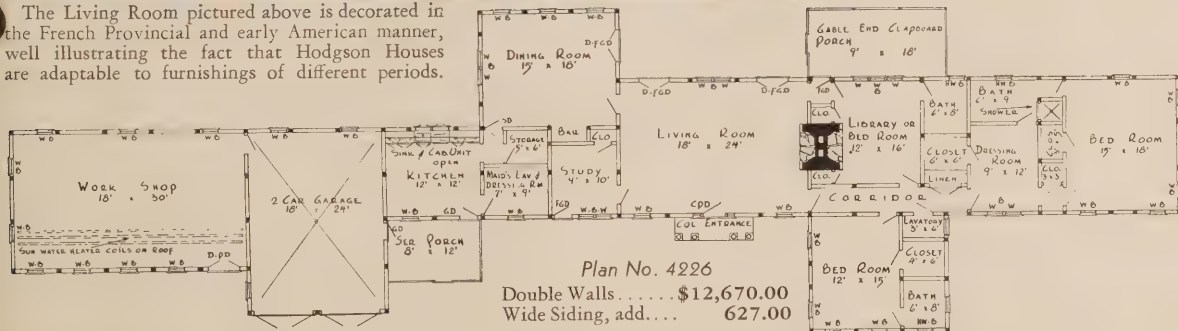

L. B. MAYTAG,
Newton, Iowa.

(Several additional Hodgson bedrooms were added to this house in 1941)

The Living Room pictured above is decorated in the French Provincial and early American manner, well illustrating the fact that Hodgson Houses are adaptable to furnishings of different periods.

Hodgson House No. 4226

At Winter Park, Fla.

A long, rambling Hodgson House, so designed that all rooms have two or three outside exposures, and together with very short wings, all rooms are subject to all breezes. Well insulated with our Arctic Lining against the southern sun, it makes an ideal Florida home.

Hodgson House No. 4227

At Clinton, N. J.

This large Hodgson House, located on a hilltop in New Jersey, offers a unique and pleasing plan. Large rooms, attractive bay windows and a large court all make for better living. The large and comfortable living room is shown in the upper right, while the courtyard, with its well house, in the lower left, has a certain, definite appeal.

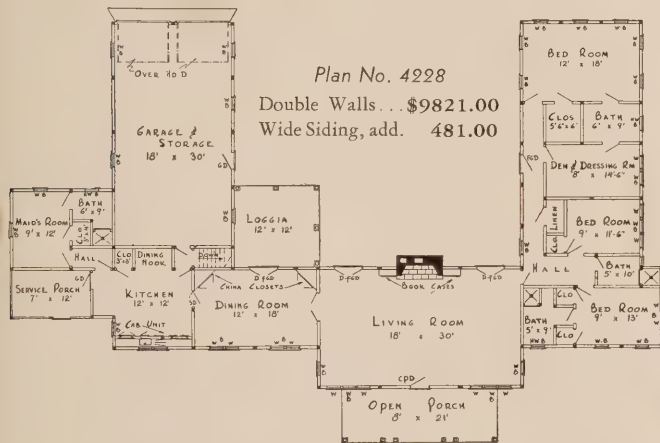

Plan No. 4227
PRICE UPON APPLICATION

Hodgson House No. 4228

The house illustrated on Page 74 (plan below) is located on a farm near New Paltz, N. Y. Well planned, heated, and air conditioned, it contains many unique features for the owner's convenience and pleasure — an ideal year around residence for his most modern farm.

Plan No. 4228

Double Walls . . . \$9821.00

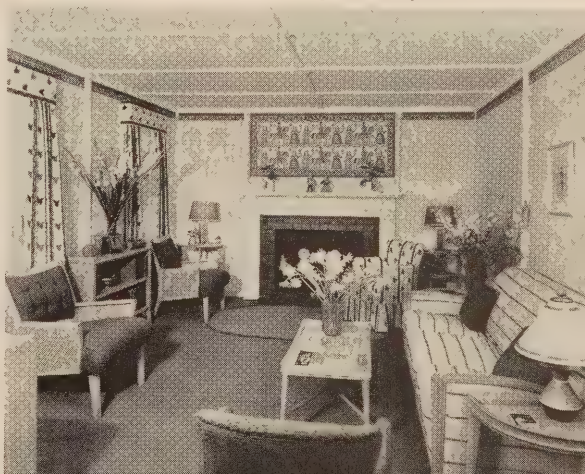

Wide Siding, add. 481.00

B
X RANCH
HOTCHKISS, COLORADO

"In answer to your very kind letter concerning our house, I wish to say that we are thoroughly enjoying its coziness and comfort. The house is situated on the top of a hill overlooking the ranch and here it is available to the icy blasts that Winter brings to the Rocky Mountains. Our elevation is approximately 5500 feet above sea level and never once have we suffered from the cold. Of course, we have an extremely efficient heating system. However, the Arctic Lining plays a very important part in our welfare. Each wing of the house is controlled by a separate thermostat to insure regular heating."

JERE BAXTER, 3RD, *Hotchkiss, Colorado*

A 12 x 18 ft. Hodgson Living Room

Hodgson schoolhouses are used by many towns and cities

Plans, photographs, specifications and cost of delivering and erecting our Schoolhouses in any Town or City, will be mailed to any School Board or Superintendent of Schools upon application.

Screened fresh air house ➡➡➡

Hospital ward 18 x 42 ft.

Cape Cod Play House

The photograph on Page 82 (plan at right) shows one of our most popular small houses. With a floor area of 10 x 15 ft., it serves many purposes — as a studio, as a play house for children, as a small camp, a hobby workshop, and many other purposes where a small isolated room is desired.

The house is made of red cedar clapboards and is shipped in completed sections that are quickly erected. The interior is fibre lined; it has a hard pine or fir floor; and the woodwork is stained brown.

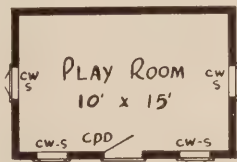

The exterior is painted white on the sides with slate green roof and trimmings.

Price \$362.00

Boston Chamber of Commerce

"The play house which you sent to me at East Gloucester this spring, I am very glad to say, has been most satisfactory. It was put up with very little difficulty and the day after it went up withstood one of the heaviest rains of the season, with no leaks. Mrs. Wadsworth and I find the house entirely satisfactory for our needs."

ELIOT WADSWORTH

Satisfactory Additions After Many Years

"With the additions now to be made, this house will be even more satisfactory than it has been for the last thirteen years, during which time it has weathered storms and even the hurricane without visible damage or wear."

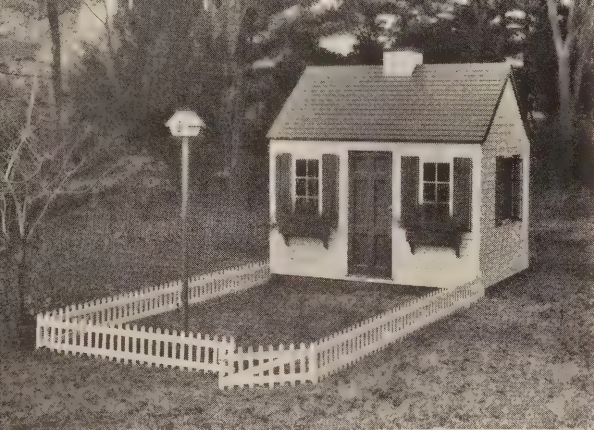

E. C. ROPES

West Newbury, Mass.

Shawmut National Bank

"My play house located in Dedham, bought of you three years ago, is a thorough delight to my little daughter, who uses this as the center of her amusements outside of our house. It has given her and her little playmates much joy and in many ways instructive pleasure."

H. WENDELL ENDICOTT

Hodgport Play House, 6 x 8 ft.

This Hodgport Play House has 4 Casement Windows, Shutters, and a Colonial Panel Door. Price includes decorative chimney. Price..... \$104.00

Price of bird house, fence and 2 window boxes... \$10.25

Hodgport Kennel, 6 x 8 ft.

This kennel has two pens and a small entrance hall. It is fitted with a drop shelf for use as a work bench.

The kennel partitions are 5 ft. high; are constructed of plywood up to 4 ft., the other foot made of kennel netting. The dog openings have tight fitting metal doors. Price..... \$130.00

The kennel yards are made of wire netting 5 ft. high, and the price is 54¢ per running foot; made in sections any size desired.

Four Hodgport Buildings

The four small buildings pictured on this page and on page 85 are attractive enough for any setting and fill a long felt want by many families. They are made 6 x 8 ft., in completed sections, of red cedar clapboards; have good floors, and are quickly bolted together by anyone. The sides are painted white; the roof and trimmings Colonial green. The height of side walls is 5 ft., 7½ ft. to the ridge.

◀◀ *Hodgport Tool House, 6 x 8 ft.*

This building is made the same as the other Hodgport buildings (see description on page 84). It is large enough to store your power lawn mower and the other usual garden tools and accessories.

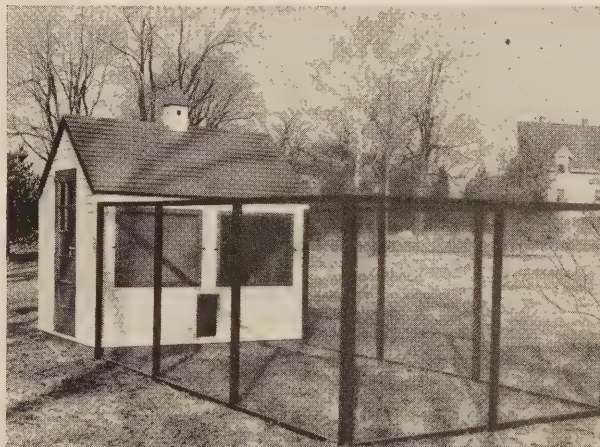

Price \$104.00

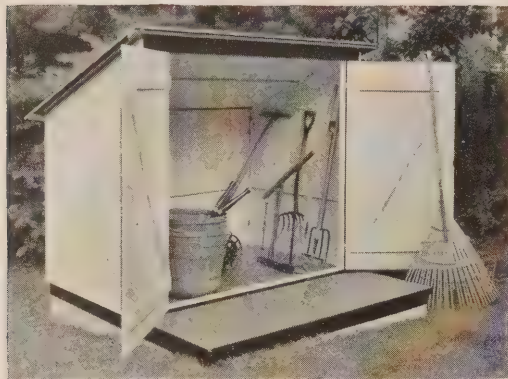

Hodgport Poultry House, 6 x 8 ft. ▶▶

This house takes care of 18 hens comfortably, and comes complete with roosts, dropping boards and nest boxes. The Celoglass shutters are adjustable to several degrees of openings and can be easily lifted out during the summer.

Price with floor, without yard \$125.00

The yard is 5 ft. high, made in sections of wire netting any size desired at a price of 55¢ per running foot.

The Utility Shed

Illustrated above, is made of Cedar, painted white and slate green, and comes complete with hard pine floor and platform, and a door lock.

The size is 4 feet wide, 6 feet long, 5 feet high. The platform, 2 x 6 feet. Price \$55.00

Tool House No. 1
\$287.00

Tool House No. 2
\$386.00

Pony Stable No. 3
\$431.00

Garden Tool House

The Garden Tool House, illustrated below, is made in two stock sizes — and a third plan for a stable, all as shown at the bottom of the page.

Each house has casement windows and double panel doors, to accommodate power mowers, the larger garden tools, and a small wagon, in the case of a stable. The box stall has a partition 4 ft. high, with a gate, and the interior of the stall is lined with heavy plywood. The building is well painted white and slate green outside, stained inside. The floor is hard pine.

Price includes cupola and shutters, but not window boxes or incline. Incline sells for \$5.00 additional, window boxes \$2.75 each. If a single door is wanted, in place of the double doors shown, deduct \$5.00.

Cape Cod Fence

This Fence is constructed of the finest grade of Washington Red Cedar, comes in completed sections, usually of six foot lengths, painted white. It is stocked in three heights, and the price includes the necessary Cedar Posts and all hardware.

27 inch height, per lineal foot.. \$1.20

36 inch height, per lineal foot.. 1.50

No. 3 Trellis

No. 3 Trellis stands about 7 ft. above ground and has a spread of 3½ ft. Painted slate green.

Price\$6.00

Cabana No. 1. 10 x 20 ft. Price \$485.00

Cabana No. 2. 12 x 24 ft. Price \$950.00

Cabanas

No. 2 Cabana, illustrated above, is as per the plan at the left. Fixtures for the shower rooms are extra, and shown on page 30. Price includes awning.

No. 1 Cabana is of the same plan as the above, except that the lounge is 10 ft. square, dressing rooms 5 x 10 ft., and shower stalls not included. The rear doors are all eliminated, two windows being supplied in rear of lounge. This Cabana has Gable Ends instead of hip, and constructed of the

same units as our Play House shown on page 82. No awning is included. Both Cabanas are well-painted outside, stained inside.

Play Boats

These boats are made of clear cedar, put together with galvanized hardware, well painted, are light in weight and easily handled, yet durable. Size about 2 x 6 ft., price including paddle. . . . \$14.00

Screened Lawn House

The screened lawn house above is 8 x 10 feet in size. The roof is cedar clapboards, the sides from floor to plate are screened with bronze netting. The screen door is located in the facing gable end.

The house is shipped complete, painted, and includes a hard pine floor.

Price \$215.00

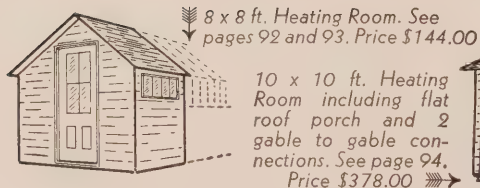

Hodgson Sectional Greenhouses

These Greenhouses are made of red cedar. The exterior woodwork is painted white sides with a slate green on the roof of the Heater Room. The interior woodwork receives one coat of aluminum paint. The Greenhouses are made in sections, so that they are easily erected and easily added to.

No wooden floor is supplied as a cement, brick or dirt floor is much more practical. Bricks simply laid in sand make an excellent floor. Plant benches as shown by plans are supplied; also a plank board walk between benches.

We show below sketches of the various sizes of heater and potting rooms which we supply, with their prices. We also give prices (Page 91) of the first glass unit and of additional glass units. Any number of glass units may be added to any of the heating and potting rooms.

12 x 12 ft. Heating Room including valley roof porch and 2 gable to gable connections. See page 95. Price \$532.00 ➡

This includes one open end and one glass end.	
Glass for above.....	42.00
Additional Units to be added to the first glass Unit. Price, each.....	132.00
These units do not have ends, but do have one frame partition.	
Glass for above.....	30.00

Greenhouse Heating

Our Greenhouses are heated by automatically controlled, coal fired hot water heaters. They are connected to four lines of pipes, that are installed under the benches, and make a complete circuit of the greenhouse.

The heaters are equipped with an expansion tank, so that they do not have to be connected to any outside water supply; simply fill the line and tank, and it should not have to be touched for a season.

Listed below are three stock greenhouse heaters. The No. 512 is suitable for heating one or two glass units; the No. 514, three to four glass Units; and the No. 516, four to six glass Units.

*One Unit
Greenhouse
with
Heater
Room*

The photograph below, plan above, shows a one unit Greenhouse with our 8 x 8 ft. potting room. To this, more glass units can easily be added at any time. Our hot water heater burns coal, is automatic and very easy to operate — consuming but little coal.

Price, without glass. \$324.00
Extra for glass. 42.00
Price of No. 512 Heater, with all necessary pipes cut to
fit. 181.00
Price of Galv. chimney and smoke pipe installed 18.00

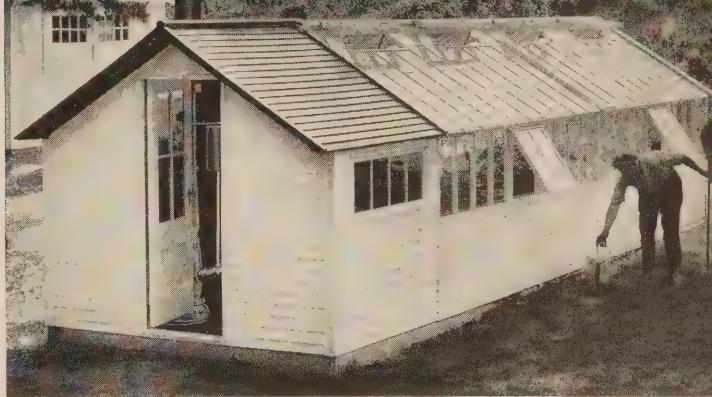

Two Greenhouse Units and Heater Room

One of these greenhouses will start thousands of early plants to be set out after the frost is gone. The operating of our heating plant is very simple.

Our No. 512 heater will easily heat these two units, but if you intend to add more units later we would recommend the use of our larger heater, which will heat up to four glass units. This would eliminate the expense of changing the heater should you enlarge the greenhouse. The larger heater would add \$21.00 to the price of \$206.00 quoted below.

Price without glass	\$456.00
Extra for glass	72.00
Price of 512 Heater, with all necessary pipes, cut to fit.....	206.00
Price of Galv. chimney and smoke pipe installed	18.00

Grows Many Plants

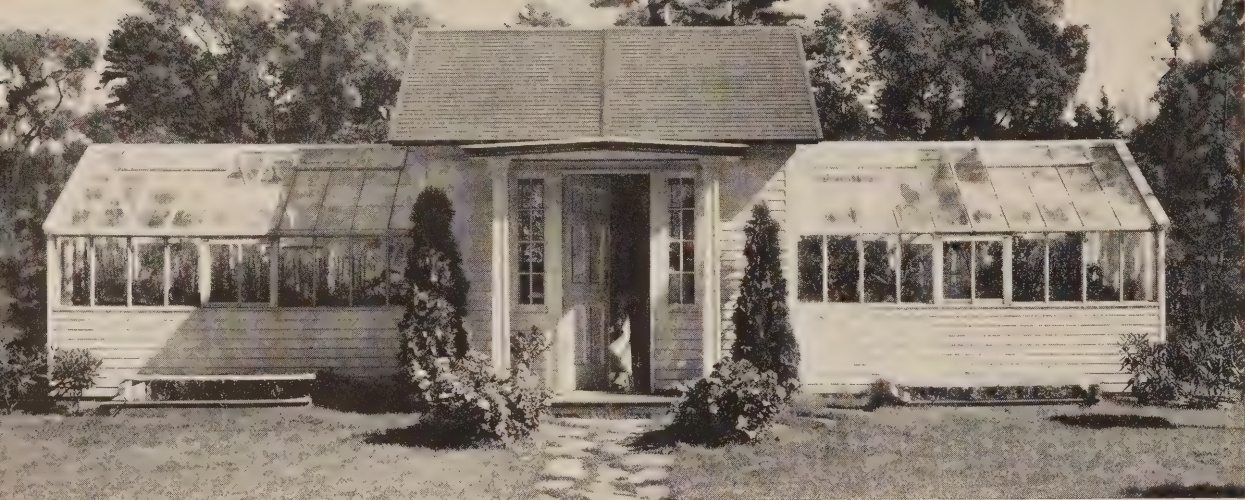

"The greenhouse has not only proved entirely satisfactory but is a prodigy of efficiency. All the flowers we can possibly use at Anchorhold and Friars Wood — many of our vegetables, and a great quantity to give away — are successfully started there. And it takes care of the rarer plants through the winter. It is hard to believe that so very much can come out of such a small greenhouse."

L. BORDEN (Mrs. Gerald Borden)
"Anchorhold," Bar Harbor, Me.

Open Cabana Not Damaged

"The Cabana at Williamstown, Mass., was not damaged in the least by the hurricane, and furthermore, it stood last winter very well."

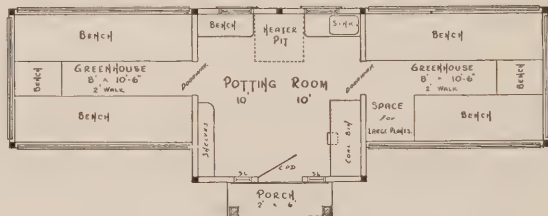

J. O. EATON
Eaton Manufacturing Company
Cleveland, Ohio

Two Unit Greenhouse with 10 x 10 ft. Potting or Heater Room

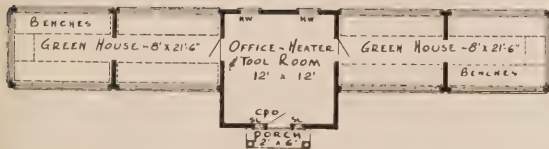

The greenhouse, illustrated above, is made of two first unit greenhouses and one of our 10 x 10 ft. Heater Rooms. Below we have quoted on the No. 514 Heater. The smaller heater could heat these two units, but with this larger, higher potting room, we strongly recommend this larger heating plant. It also gives opportunity of extending one more unit at each end, without the necessity of replacing the heater.

Price of Greenhouse above without glass.....\$738.00
 Extra for glass..... 84.00
 No. 514 Heater, with all necessary pipes cut to fit..... 267.00
 Galvanized Iron Chimney..... 18.00

Pigeon House No. 1

This pigeon house, with a flight cage attached, is practical for from five to ten pairs of pigeons. We furnish nesting room for five pairs, 10 nests, but more can be easily added. We also furnish an automatic feeder, a water dish, and ample perches. Size 4 x 4 ft. x 5 ft. High. Cage 4 x 6 ft. Capacity, 5 to 10 Pairs.

Price.....\$48.00

PIGEON NESTS — We furnish with our pigeon houses fiber nests, one called a Master Nest into which is placed a filler nest. The Master Nest is durable and waterproof. The filler nests are replaceable.

Prices: Master Nests 18¢ each or \$2.00 dozen. Filler Nests 30¢ per dozen.

Pet Stock House

For Chickens, Rabbits, Guinea Pigs, Small Dogs, Cats, etc. is made in three parts, the house with a two-foot yard, an extended yard four feet long that is detachable, and a shelter board for protection from sun and storms. Price of house, \$6.00. Extended Yard, \$3.60; Shelter Board, \$1.20. Price Complete, \$10.80. Wire bottom for yard when used for rabbits, \$1.80.

97

Hodgson Poultry and Pet Stock Houses

All of our Poultry and Pet Stock Houses are constructed in completed, painted sections of Washington Red Cedar.

This Cedar not only prolongs the life of the building for many years, but is also vermin-proof and easily kept clean.

The buildings can be moved easily at any time, can be taken apart and stored if desired without creating damage of any kind.

Colony Coop No. 1

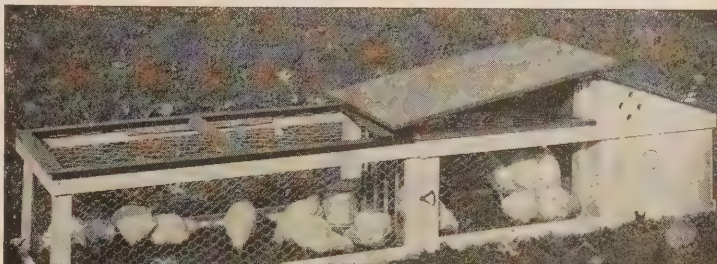

The Colony Coop, illustrated above, is fitted with a floor and 2 three foot roosts, giving ample room for 20 growing chickens or ducks. They are kept in this coop until ready for laying quarters. The open netting front is fitted with a canvas cover. Made of red cedar, with a corrugated cedar roof — neatly painted. Size, 3 x 3 feet.

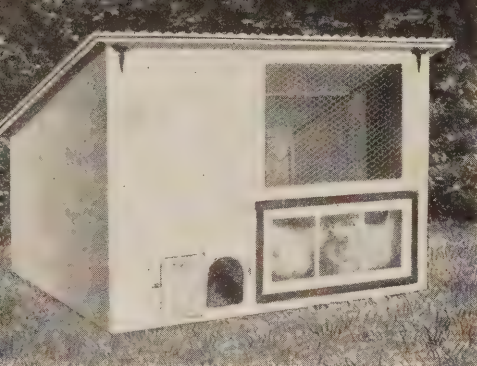

Price.....\$16.00

Poultry Yard

We manufacture a 3 x 8 foot poultry yard for this Colony Coop. This is illustrated on page 102, attached to our No. 0 Kennel.

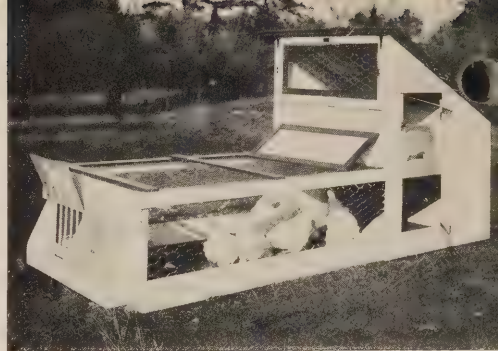

Price.....\$9.50

Colony Laying House No. 0

This complete No. 0 laying house for twelve hens has an upper laying and roosting room, and a lower scratching shed and yard. It is complete with nests, roosts, water dish, feeder; in fact everything ready for the hens. It is neatly painted and can be key bolted together in a few minutes by anyone. Size including yard — 4 x 10 ft. x 5 ft. high. Price\$39.00

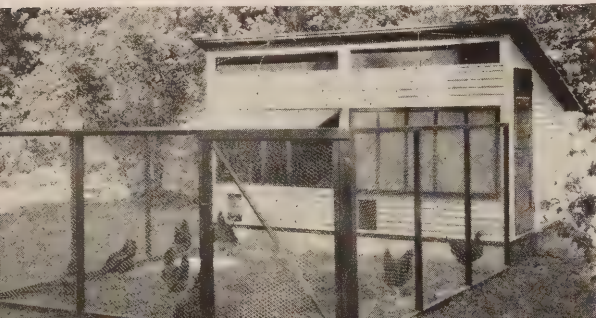

Colony Laying House No. 2

This Laying House, for 8 hens, is 4 x 6 feet in size. The roof is hinged to open, giving access to the interior. Shipped in completed, painted sections, including roost, dropping board, water pan and nest box. Price.....\$30.00

Wooden Floors \$12.00 per unit extra

Laying House No. 5. 2 units illustratedPrice \$200.00
Sectional yards of one inch poultry netting 5 ft. high, 55¢ per lineal foot, including gate.

Laying House No. 4

The Poultry House illustrated at the left is our largest unit model. The large front openings are covered with a Cel-o-glass hinged frame, and together with the wired covered lower windows, give an abundance of light and ventilation.

The first unit may be used as a feed room by substituting a front section containing two transom windows and a bench, in place of the poultry house front, at no extra charge. The price includes complete equipment, is stained inside, painted outside.

This house is built in ten-foot units, each unit having a capacity of 25 hens. Plan at left is a five unit house, for 125 hens.

10 x 10 ft. House (1 pen).....	\$180.00

Wooden floors, extra per unit...	15.00

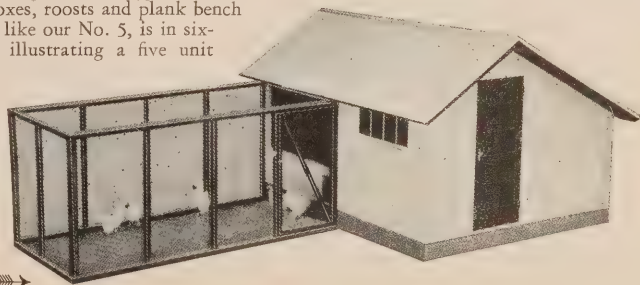

If one front section with transom window is wanted to form feed room, including plank bench (this to be substituted in place of regular poultry house front and equipment) there is no charge made.

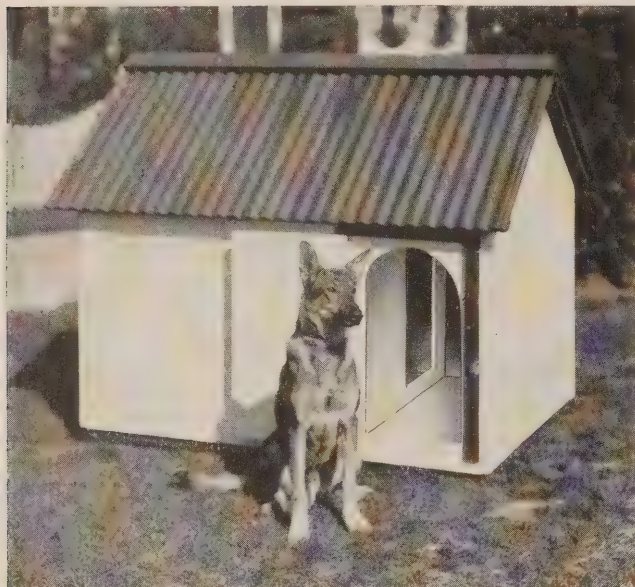

Laying House No. 6

This new design of sectional poultry house is made of enduring vermin-proof cedar, treated with a disinfectant stain inside, painted three coats outside. Being made in sections, it can be ordered in as many units as required, and additional units can be added as needed.

The long back roof slopes down to a four foot back wall, thus affording a warm location for the roosts. The front is equipped with a Cel-o-glass frame, swinging in, a wire frame outside. This Cel-o-glass lets in ultra violet rays, affords plenty of light, is non-breakable and makes a warm house at night. The house comes completely equipped with mash hopper, water pan, nest boxes, roosts and plank bench in feed room. This house, like our No. 5, is in six-foot multiples, the plan illustrating a five unit house, with one unit being used as a feed room.

Hodgson Kennels

These Kennels are made with and without interior partitions. They have a correct ventilating system and are made of enduring, sanitary cedar sides and roof — a Hard Pine floor.

The interior is shellacked, exterior-painted white sides, slate green roof. Floors and Roofs are detachable for cleaning. The interior compartment of the No. 1 Side Door style is 28 x 28 inches and the No. 2 is 38 x 38 inches.

English Kennel

These English style Kennels are made in two sizes, have an easily removed roof for cleaning, the floor is of Hard Pine, the sides, partition and roof of Cedar.

The sides are finished in natural Cedar, oiled. The roof is stained a moss green.

The partition offers the dog protection from the weather, the low pitch roof is absolutely weather tight and is used by the dog for sunning. The No. 1 size is illustrated above.

Hodgson Unit Kennels

Details of No. 4 and No. 5 Unit Kennels

These kennels are made up of kennel units and other units for use as office, heater room, conditioning room, feed room, etc. They are made up in almost any combination of kennel pens desired and can be added to at any time. Glass units for exercising the dogs are extensively used and are very desirable.

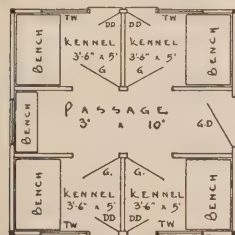

The Exterior of these kennels is covered with red cedar siding, painted white on the sides and slate green on the roof. Cedar is extremely durable and sanitary and should last a lifetime.

The Interior is made of cedar and Oregon pine with

a hard pine floor. If a cement floor is wanted, an allowance is made for the wooden floor. The floor is shellacked, the other woodwork is stained walnut. Partitions and gates are made of sheathing up about 4 ft. with 2 to 3 ft. of kennel netting above. The dog bench or bed is made of cedar and elevated from the floor. It is detachable for cleaning.

Each kennel pen as shown by plans on the following pages has a window, a gate, and a dog door. This latter is controlled by a cord to open from the hallway. Outside kennel yards are supplied at extra cost.

No. 5 Kennel Plan A

Price..... \$318.00

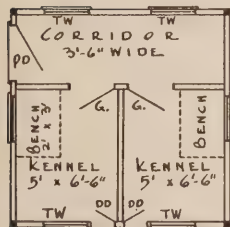

No. 5 Unit Kennels

Our No. 5 Kennels are made up of 10 x 10 foot Units and are nine feet high. They are completely furnished with partitions, benches, gates, etc. as shown by the plans and figured as follows:

See details on pages 103 and 106

No. 4 Kennel Plan A with two kennel pens to each 6 x 12 ft. Unit. Price \$1481.00

No. 4 Kennel Plan B with one kennel pen to each 6 x 12 ft. Unit. Price \$1361.00

No. 4 Kennel

This kennel is made in 6 x 12 ft. Units. As many Units as desired can be purchased, and more added at any time. We show two arrangements of kennel pens; Plan A having a central corridor with pens on each side (2 pens to a 6 x 12 ft. Unit); Plan B with a rear corridor with one pen to each 6 x 12 ft. Unit.

Tulgey Wood Kennels

"Your buildings have been much admired by the many visitors that we have had. They lend themselves very well to cleanliness which we consider essential."

Erwin O. Freund,
Hinsdale, Illinois

See Picture at Right

Hodgson Kennel in Williamstown, Mass.

This Kennel, made up of our stock Plan B No. 4 kennel Units with office, has in addition, a separate heater room, feed room, storage, etc. The plan below shows how this kennel is arranged. It is well laid out, entirely self-contained, and it is unnecessary to have separate buildings for maternity ward, office, etc.

When planning a kennel, let us know your requirements and we will work in any special features that you may have in mind.

BLARNEY KENNELS

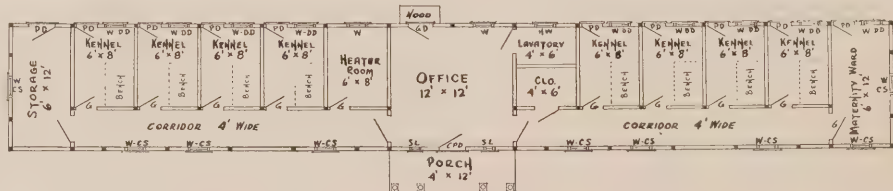

John G. Bates, Owner

"It gives me great pleasure to write you and let you know that the large kennel and the cottage which I bought from you years ago have given me complete satisfaction."

"They have withstood all weather changes and are in practically the same condition now as when erected."

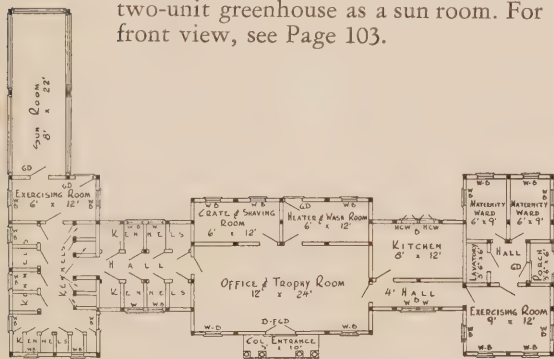

JOHN G. BATES,
James St., Morristown, New Jersey

Price of this Kennel, \$3,438. If double walls are desired, add \$673. Add for wide Colonial Siding \$192

The above photograph is the rear view of the Clairdale Kennels on Long Island, showing the dog runs and a two-unit greenhouse as a sun room. For front view, see Page 103.

This special kennel is made up of our 12 ft. and 18 ft. wide house units, with the double wall construction, sheathing and celotex being used on the interior.

There is a ceiling over the entire building. The hard pine floors are double boarded.

This Kennel contains almost every conceivable idea that can be created for the care and comfort of dogs. Any one, or all, of the details shown in the plan may be incorporated in any of our Kennels and we should be pleased to send you plans and estimates worked up to your own ideas.

CLAIRDALE KENNELS—DURING 1938 HURRICANE

"We lost a great many large trees but suffered no building damage. I might add that during the height of the storm I went through the kennel and found all of the windows open. I immediately had them closed. I honestly believe there would have been no damage had I not seen that the windows were open and they had remained in that position."

W. O. PENNEY, Riverhead, N. Y.

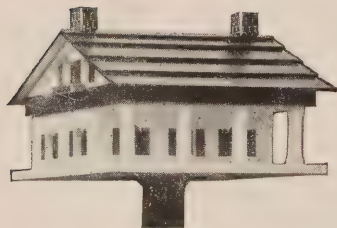

Hodgson Bird Houses

Martin Special — Price \$21.00. 18 x 21 inches — 10 large rooms (for pairs) 20 ft. Pole. Price, without Pole \$16.50

Colonial Bird House — Price Complete, \$30.00. 26 x 23 inches — 28 rooms — 16 ft. Pole. Without Pole \$26.00

LARKIN CO., BUFFALO, N. Y.

"The Bungalow Bird House arrived last week. I thought you would be interested to know that before I had finished setting the pole in the ground there were a dozen swallows flying around to make an inspection of the house. They seemed to like it very much."

"I got a lot of pleasure out of watching these swallows and I now have three houses full of them. Not only are they fun to watch but they destroy the swarms of bugs of which there are many in this region."

J. CRATE LARKIN

Birds Flock to Them

"I saw today at a neighbor's, birds flocking to a bird house of yours, so I am straightaway ordering one of the same."
MRS. E. BROWN BAKER, 1109 Parkway East, Utica, New York

No. 3.....	\$1.75
No. 4.....	1.50
No. 7.....	1.75
No. 8.....	2.00

"Last year I bought one of your Villa Bird Houses. On April 10th Martins came and looked it over and were pleased with it. I have counted as many as 60 Martins around the house. Later Flickers raised a family in the attic. The openings are a little small for Flickers but they pushed in and I allowed them to stay. Many people stop to look the house over and we are pleased with it."

CHARLES W. MACK
332 Irving Ave., Dayton, Ohio

No. 9 Wren House 2 Rooms — 10 ft. Pole. Painted white and dark green. Price\$5.00 Without pole....4.00

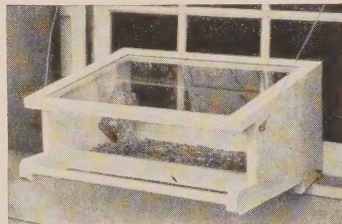

Hodgson Bird Feeders

A few of these feeders scattered around your place will attract many birds.

They are all attractively painted white and dark green, except the small revolving feeder, which has oiled sides, green stained roof.

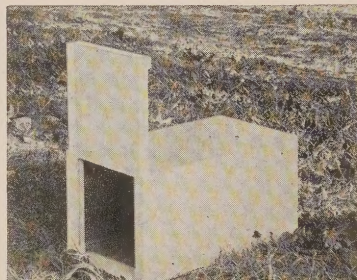

Winter Haven Feeder

Food supplied through open window. Watch the birds feeding. Protected from weather. Price.....\$5.00

Revolving Feed Box with 7 ft. Iron Pole. Size 24" x 36". Has glass in back, with open front. Suet cage attached inside. Painted. Price \$10.00
Smaller Size 16" x 26" with a Wooden Pole (Oiled & Stained).....\$6.00

Window Feeder

To be attached to window sill, tree, or side of the house. Grain tray and suet cage. Price\$1.75

Automatic Feeder

Fill the grain compartment and the food drops into the tray as the birds eat it. Price \$3.00

Robin's Nest

As Robins will not enter enclosed houses, this highly successful little shelter should be placed around tree branches, or in shrubs. Price \$1.75

Stationary Feeder

This popular style Feeder has an open bottom, with a small tray just under a large feeding tray inside the glass shelter. It includes a 7 ft. pole, and shelter is 24 x 24 inches. Price.....\$15.00

Trap for Bird Enemies

Harmlessly catches cats, squirrels, weasels, skunks, etc., and automatically locks when closed. Stained brown. Price.....\$6.00

UNIT PRICE LIST

The following prices are for the Hodgson Houses in the single wall construction, which has the framework exposed with a backing of tan-colored fibre lining; the woodwork stained brown.

The Camp Cottages (pages 3 to 27) are oiled on the outside and the roofs are stained green. These are made in the single wall construction only.

The Hodgson Houses (pages 32 to 81) have one coat linseed oil and two coats of the best lead and oil white paint on the exterior sides; with a choice of a sectional clapboard roof painted slate green, or with asphalt or cedar shingles to be put on at the time of erection.
